

Those Who Likely Knew

The below names, and some groups, demonstrate writings and ideas that conform to having been given access to radically different ideas of their times. These ideas conform to descriptions of the world outlined in the books *Procession of Sentience* and *Book of Ages*.

Briefly, these people describe a world interpenetrated by high technology non-human sentient creatures. A hermeneutic evaluation would be needed to interpret ideas such as DNA/genetic engineering, UAP/UFO, and other ideas requiring a modern scientific basis that people in the past did not possess.
