"Дирисабль" в Гиги-Шаке.

"Урожай", Ул.-Мазар." Всес. учёны.

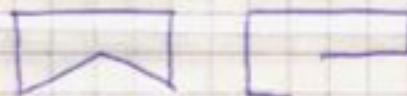

Новозеландско сорт. Журбен. Т. Г. Св.
одн. 1991, (?) 1992.

МИ-8 - 1995.

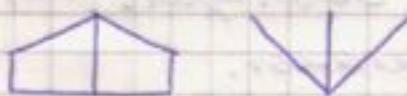

"Маркировка"

кл.

Размеры ~ 620 м
x 120 м

Центральная часть
разорвана воздушно-
но-самолетным взрывом.

Поражающим эффектом взрыва является сильнейший
стриктуальный эффект на полях, то есть
отрывки всех частей на удалении более 600 м от
объекта.

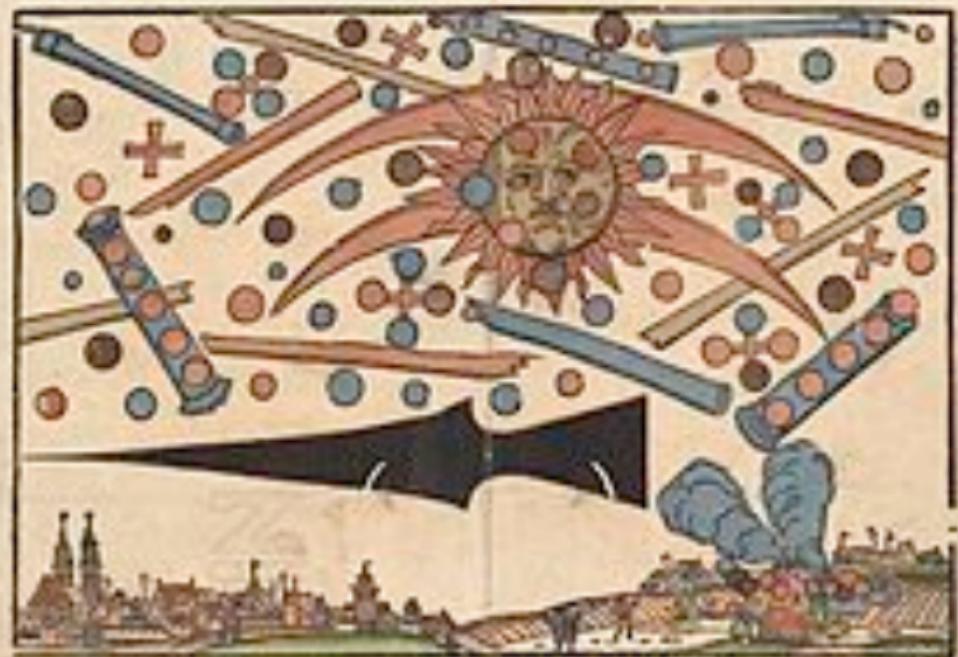

Кроме того отмечается полное отсут-
ствие пахотного поля на том же расстоянии
занятое в образцах исключительной породы (изогрибы).

The W. D. L. N.Y. Letters 2000, no. 2000, is a collection of letters from the period 1860-1865, written by a man named W. D. L. N.Y. The letters are addressed to his wife, Mary, and they discuss their life in New York City during the Civil War. The letters are written in a formal, handwritten style, and they provide a unique insight into the daily life of a Union soldier's wife.

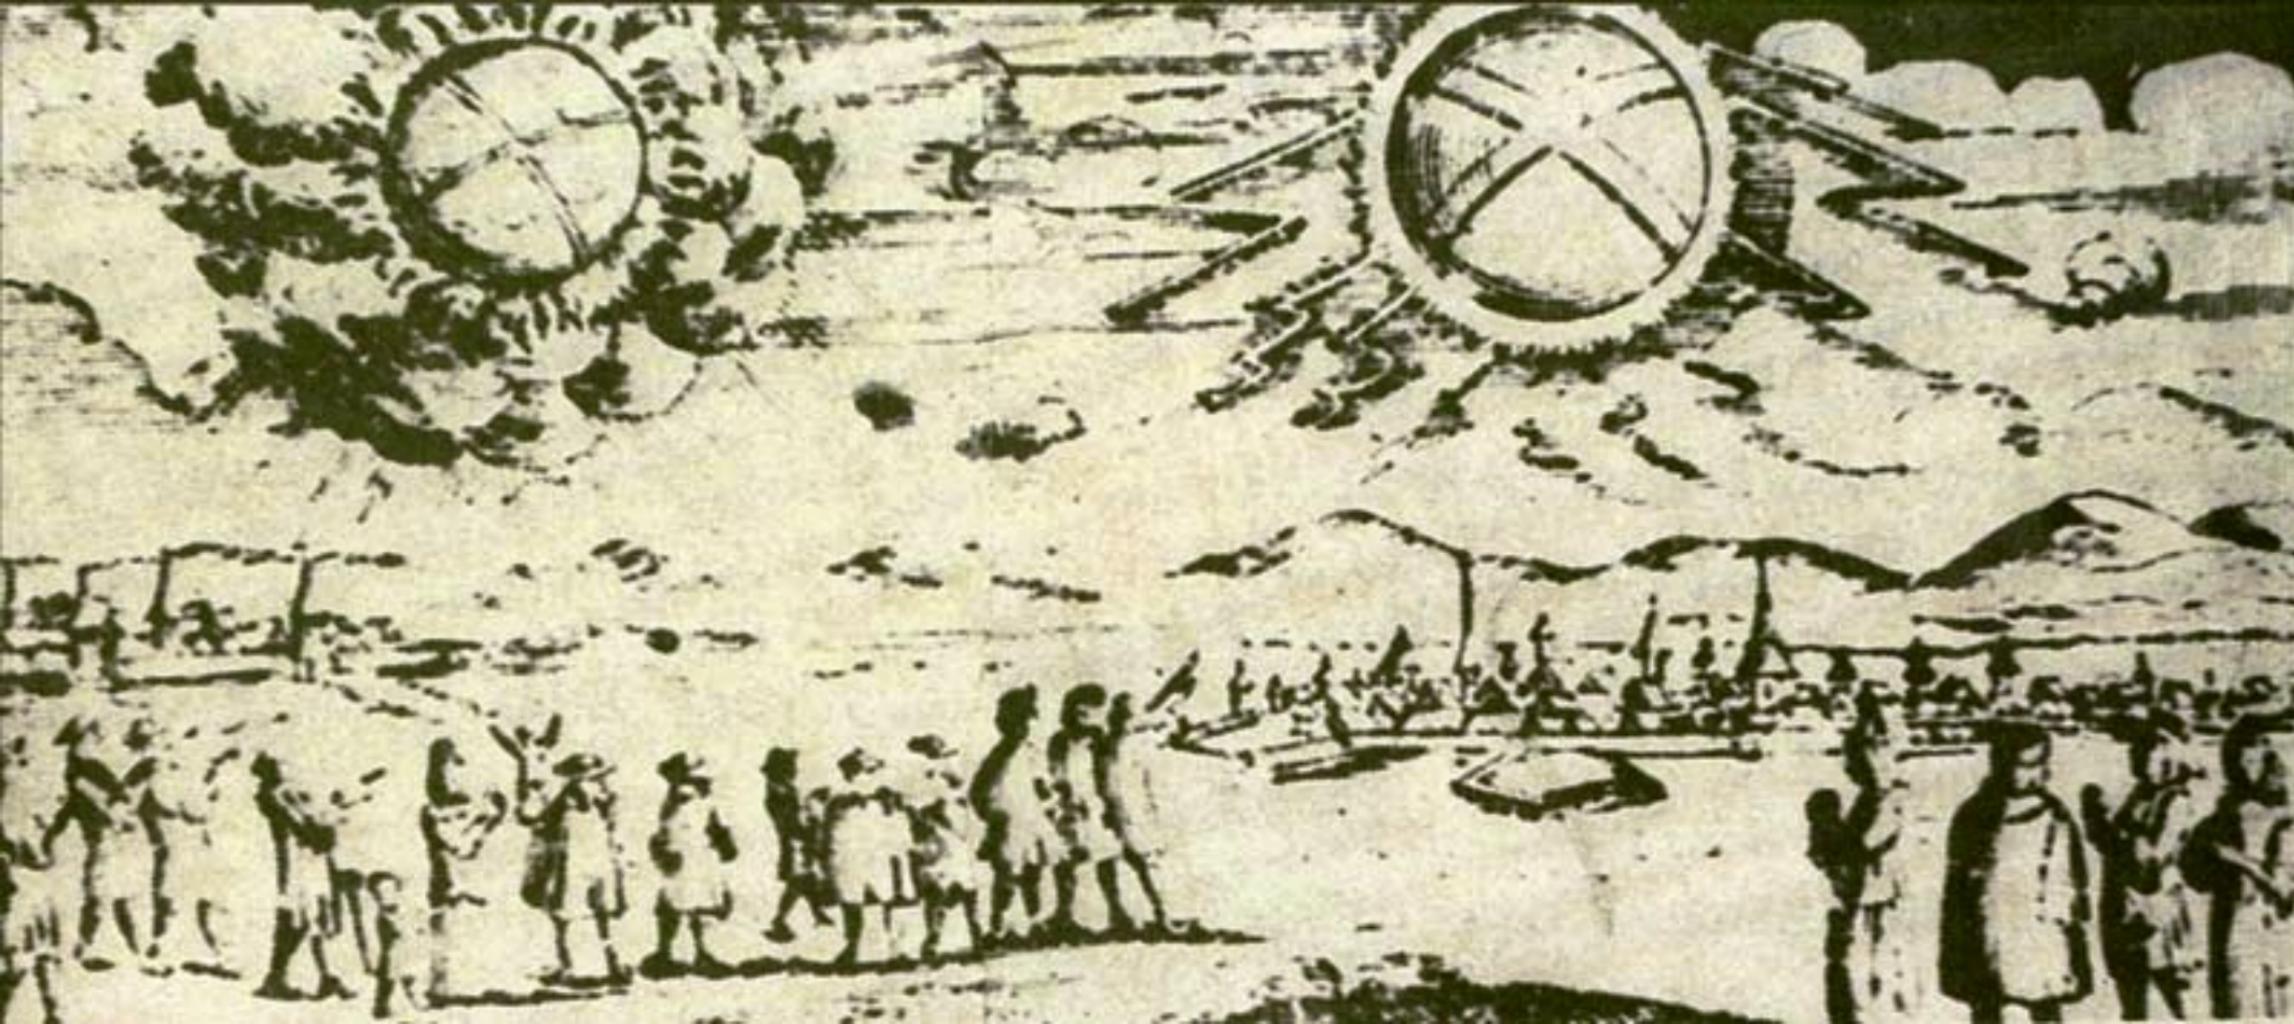

such as Rausch's, which is to say that the people who are most likely to be influenced by the media are those who are least likely to be influenced by them. In other words, the media do not have a significant influence on the opinions of those who are most interested in politics, nor do they have a significant influence on the opinions of those who are least interested in politics. The media's influence is greatest on those who are moderately interested in politics.

UFO Sighting over Basel, Switzerl and

This broadsheet picture by Samuel Coccius illustrates a UFO sighting over Basel, Switzerland in 1566. 'Large black Globes' appeared in the skies. It is held at the Wickiana Collection, Zurich Central Library.

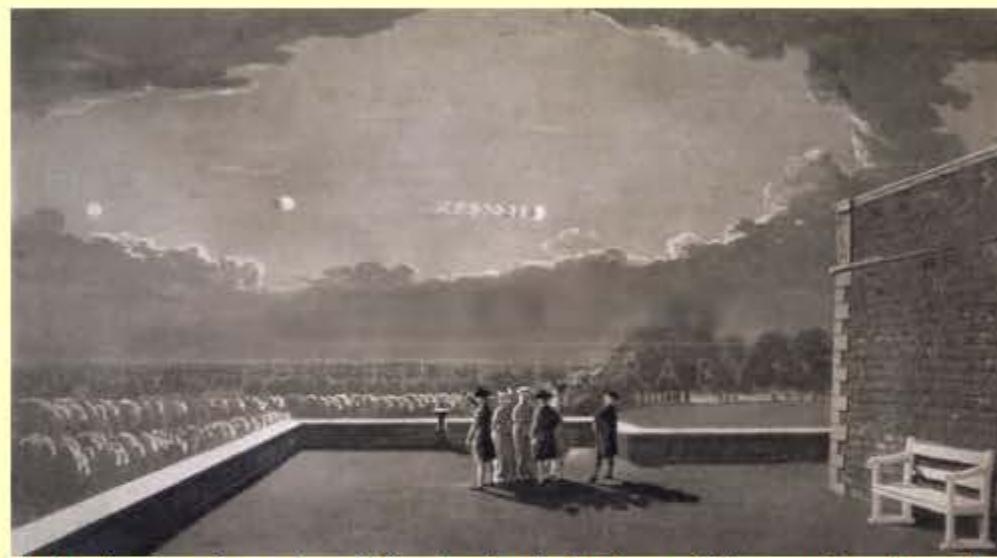

Luminous UFO seen from Windsor Castle in 1783

Date: August 18, 1783

Location: Windsor Castle, England, United Kingdom

This illustration depicts a sighting that occurred at 9.45pm on the evening of August 18, 1783 when four witnesses on the terrace of Windsor Castle observed a luminous object in the skies of the Home Counties of England: "An oblong cloud moving more or less parallel to the horizon. Under this cloud could be seen a luminous object which soon became spherical, brilliantly lit..."

The illustration has been done following the indications of Thomas Sandby, a founder of the Royal Academy, and his brother Paul, both of whom witnessed the event.

Source: *UFOs at Close Sight*

This illustration depicts a sighting that occurred at 9.45pm on the evening of August 18, 1783 when four witnesses on the terrace of Windsor Castle observed a luminous object in the skies of the Home Counties of England. The illustration has been done following the indications of Thomas Sandby, a founder of the Royal Academy, and his brother Paul, both of whom witnessed the event.

The sighting was recorded the following year in the *Philosophical Transactions of the Royal Society* (1784), who relates what witnesses observed:

"An oblong cloud moving more or less parallel to the horizon. Under this cloud could be seen a luminous object which soon became spherical, brilliantly lit, which came to a halt; this strange sphere seemed at first to be pale blue in colour but then its luminosity increased and soon it set off again towards the East. Then the object changed direction and moved parallel to the horizon before disappearing to the South-East; the light it gave out was prodigious; it lit up everything on the ground."

Note: According to the Science & Society Picture Library (UK), the illustration depicts 'the meteor of 18 August, 1783.' The following is the caption for this illustration from their website:

Print showing members of the nobility (King George III?) observing a very bright shooting star called a bolide from the terraces of the royal palace of Windsor Castle. Titled 'The meteor of August 18, 1783...', the aquatint was produced by Thomas Sandby after a watercolour by Paul Sandby. The dazzlingly bright meteor was seen widely in surrounding areas of England and disintegrated into several parts.

LOSS OF THE SAN BENITO

The Steamship Wrecked on
the Beach Near Point
Arena.

EIGHT MEMBERS OF THE
CREW DROWNED.

Eleven Are Rescued and Twenty-
Four Still Cling to the
Rigging.

FUTILE ATTEMPTS TO EFFECT
THEIR RESCUE.

Heavy Seas Break the Vessel in
Twain and Sweep Over the
Unfortunate.

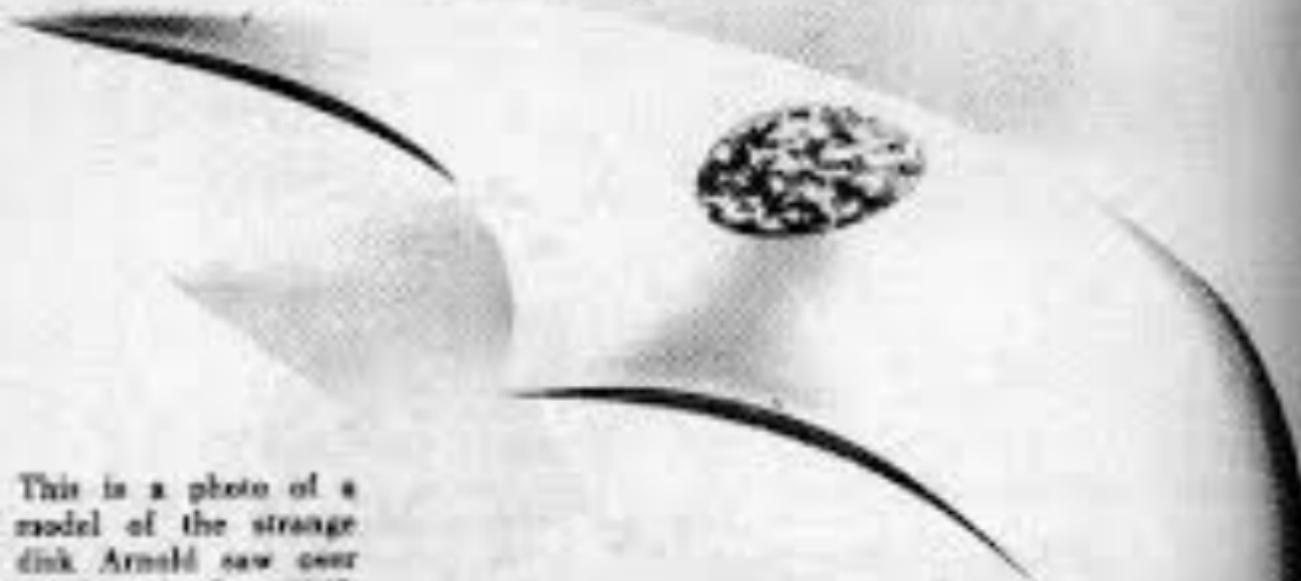

POINT ARENA, Cal., Nov. 22.—The Pacific Improvement Company's steel screw steamer San Benito was driven ashore two miles north of the Point Arena light by a gale at 11 o'clock this morning. Eight of the crew were lost, eleven reached the shore and the rest, twenty-four in number, are clinging to the rigging, even now minute by minute changing end. The names of the known dead are:

G. W. SCOTT, first assistant engineer.
C. CONDON, second assistant engineer.
M. PENDERGAST, Roman.
M. SHERIDAN, master.

The steamer struck on the sand beach and after breaking in two the stern swung around and now lies about 100 feet from the beach, stern to shore. The forward part, on which the crew cling, lies broad

This is a photo of a model of the strange disk Arnold saw over the Cascades June 1947.

from "The Coming of the Saucers" by Kenneth Arnold & Ray Palmer (Palmer Publishing, 1952). Note that Arnold described a boomerang-shaped object that "skipped" like a saucer, but did not "look" like a saucer!
